

Supplier Chemical Management Solution

Enabling brands and suppliers to comply with chemical regulations, including generating ZDHC InCheck reports.

How does CleanChain work for you?

- Streamline environmental reporting
- Save time and reduce administration
- Gain deep insights into chemical, water and waste management activities
- Be the first to know when legal requirements change
- Make better-informed sourcing and manufacturing decisions
- Integrate with other systems easily through data standards
- Reduce the number of audits, tests and information requests

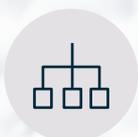

Key Features /What Makes CleanChain Unique?

Bulk upload Safety Data Sheets

Performance benchmarking and conformance reporting

Linked to third-party standards

Multiple data entry processes,

One system for all your inventory

Customer linking to seamlessly share data

CleanChain, provides one secure and centralized location to record and track your chemical, wastewater and regulatory compliance metrics across multiple standards and regulatory requirements.
