Unlock your Gateway Data

Introducing CleanChain Compass: Your Partner in the Brands to Zero Programme
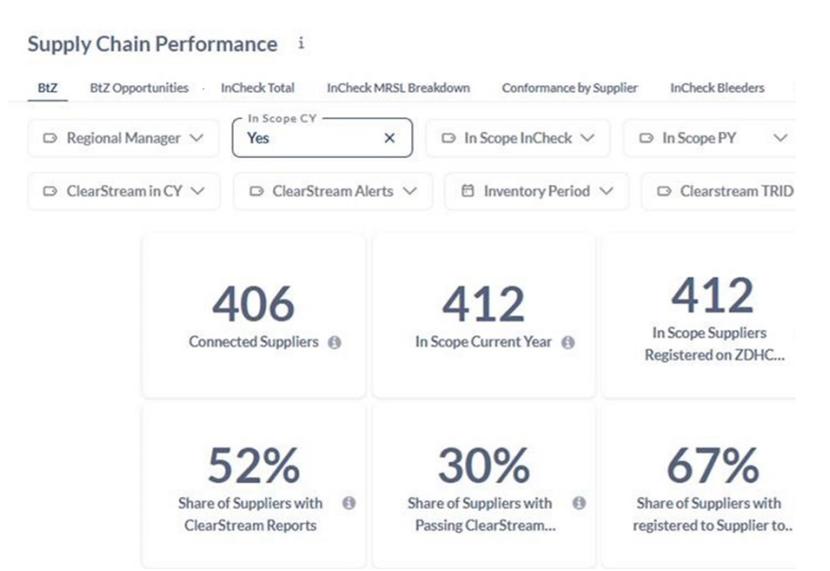

The Challenge

Achieving zero environmental impact is no easy task. Brands face numerous challenges in assessing and verifying their environmental goals, including the complexities of data collection, compliance verification, and ensuring consistent implementation of sustainability efforts across their supply chains. These obstacles can make it difficult to track progress and achieve meaningful results.

What can be seen on the dashboard?

- **Supply Chain Performance**

  Get a comprehensive view of your Gateway data, with access to key metrics and customizable KPIs, enabling you to extract valuable, actionable insights

- **In-Scope Suppliers and Facilities**

  Monitor suppliers and facilities that fall within your programme's scope for easy tracking
  .

- **ClearStream and InCheck Overview**

  Gain a clear picture of your suppliers' environmental performance with streamlined data access

- **Supplier to Zero Progress**

  Track the number of suppliers registered in the Supplier to Zero program for continuous improvement.

The Solution

CleanChain Compass provides brands with a streamlined, customizable solution to achieve zero environmental impact. Through the Brands to Zero dashboard, brands gain a clear, real-time overview of their entire supply chain, no matter how complex or dynamic. By integrating data from the Gateway, CleanChain Compass generates a single comprehensive report—**regardless of the solution provider**—offering customizable filters to meet specific needs, including regional breakdowns. Instead of dealing with the chaos of constantly shifting supply chains, CleanChain Compass simplifies reporting and provides real-time insights. Simply provide us with your ZDHC brand key, and you'll have instant access to up-to-date, actionable data at your fingertips.

Benifits of CleanChain Compass

Gain a clear overview of supplier performance with InCheck reporting, tracked month by month, with the ability to extract data for deeper analysis.

Reports include key details such as supplier names, inventory periods, and can be filtered   by customizable time frames to fit your needs.

Easily follow up and take action with suppliers based on real time data, improving collaboration and efficiency.

Reduce the internal time and resources required for compliance, freeing up your team to focus on other critical business areas.

Accelerate the completion of compliance processes, ensuring your brand stays on track with environmental goals.
